

Word Processing

Opening Word Processing Package

- Click the **Word** icon on your desktop, Start Menu, or Taskbar.

- Or search for "Word" in the Windows search bar and open **Microsoft Word**.
- When opened, you see a start screen with templates (Blank document is default).

Here are examples of the modern Microsoft Word interface (Ribbon with tabs like Home, Insert, etc.):

edu.gcfglobal.org

learn.microsoft.com

Menu Bar, Using The Help, Using The Icons Below Menu Bar

- **Menu Bar / Ribbon** — Top area with tabs: **File, Home, Insert, Design, Layout, References,**

Mailings, Review, View, etc.

- **Quick Access Toolbar** (icons above or below the Ribbon) — Usually has Save, Undo, Redo.
- You can customize it.
- **Help** — Click the ? (question mark) icon in the top-right corner →

opens Microsoft 365 Help pane. Type your query (e.g., "how to insert table").

Here are examples of the **Quick Access Toolbar** icons (commonly Save, Undo, Redo below or above Ribbon):

Microsoft Word Tutorial - Applying WordArt

Mail Merge

Powerful for letters, labels, envelopes, emails.

Steps:

1. Mailings tab → Start Mail Merge → Letters/Labels/Email Messages.
2. Select Recipients → Use Existing List (Excel) or Type New List.
3. Insert Merge Field (e.g., «First_Name»).
4. Preview Results.
5. Finish & Merge → Print Documents or Send E-mail Messages (using Outlook).

Here are step-by-step examples of Mail Merge in action:

Macros

Macros automate repetitive tasks.

- View tab → Macros → Record Macro → Give name → Perform actions → Stop Recording.
- Run later via Macros dialog.
(For beginners: Use sparingly as it records exact mouse/keyboard actions.)

Use of Local Language (e.g., Hindi in Uttar Pradesh, India)

- Enable Indic language input: Settings → Time & Language → Language → Add a language → Hindi → Install.
- Use **Microsoft Indic Language Input Tool (ILIT)** or built-in Hindi keyboard.
- Switch input: Win + Spacebar (between English & Hindi).
- Type directly in Word — it supports Unicode fonts like Mangal, Aparajita.

Here are examples of Hindi/local language typing in Windows/Word:
