

CLASS 2 – TASK SHEET (Typing, Save, Editing)

After This Class, You Should Know:

✓ What is Notepad ✓ Difference between Save and Save As ✓ Difference between Cut, Copy, and Paste ✓ How to type and edit text ✓ How to create, save, and rename files

Type the Following in Notepad:

Save: Save updates the same file in the same location.

Save As: Save As creates a new file with a different name or location.

Copy: Copy creates a duplicate of selected text.

Cut: Cut removes the selected text and allows you to move it.

Paste: Paste inserts copied or cut text.

Practical Tasks (Follow Step by Step):

1. Create a folder with your name on Desktop.
 2. Open Notepad and type the given theory.
 3. Save the file inside your folder with name: notes
 4. Use Save As and create another file with name: notes_copy
 5. Copy the first two lines and paste them at the end of the file.
 6. Cut the last line and paste it at the top of the file.
 7. Add one new line at the end: I am learning computer skills step by step.
 8. Press Ctrl + S to save changes.
 9. Close the file and open it again from your folder.
 10. Rename the file notes_copy to: final_notes
-

Challenge Task:

11. Create a new Notepad file and write 5 lines on: My Goal in Learning Computer

Save as: my_goal

? Ask Your Trainer:

If you are unable to do any step, ask your trainer to explain again until you understand.
