

MISSION SHEET (Advanced File Manager Challenge)

After This Class, You Should Know:

- ✓ What is a File and Folder
 - ✓ How to create, rename, and delete folders
 - ✓ How to copy and move files
 - ✓ Difference between Copy and Cut (Move)
 - ✓ How to delete and restore files from Recycle Bin
 - ✓ How to organize files like a professional
 - ✓ How to manage files under real working conditions
-

Scenario:

- 👉 You just got a job. Your system is empty and you need to create and organize everything yourself.
 - 👉 You must create files, create confusion, and then organize like a professional.
-

MISSION 1: Create Your Data (Build Chaos)

1. On Desktop, create 3 Notepad files with names:
file1
notes
work
2. Write 2–3 lines in each file and save them.
3. Create 1 more file and name it:
report

- 👉 Now your Desktop should have multiple files.
-

MISSION 2: Setup Office Structure

4. Create a main folder:
Office Work

5. Inside it, create:
Documents
Images
Important
-

MISSION 3: Organize Files

6. Move all text files into Documents folder.
7. Copy one file into Important folder.
8. Rename the copied file to:
report_copy

 Decide properly: Move or Copy?

MISSION 4: Controlled Mistake

9. Delete one file from Documents folder.
 10. Open Recycle Bin.
 11. Restore the deleted file.
 12. Move it back to correct location.
-

MISSION 5: Smart File Handling
